

# Irish Automotive: Setting the future in motion

Irish Automotive & Mobility

## ■ Why partner with Irish automotive and mobility companies?

- The global automotive and mobility industry is undergoing transformational change. New technologies, solutions and materials are needed for a connected, autonomous, shared and electrified future. Ireland delivers this innovation, providing engineering and design services, digital solutions, electronics, components and materials to global leaders. It is developing integrated, more sustainable transport systems that fight congestion and pollution.

Irish businesses are making a global impact, delivering innovative solutions to some of our most pressing challenges. They draw on expertise in Machine Learning, Urban and Micro Mobility, Electric Vehicles, Cloud, Data, IoT and Cybersecurity. Ireland's unique strengths in the sector give its companies an advantage.

### Ecosystem

A collaborative value chain includes Future Mobility Campus Ireland, Jaguar Land Rover's CAV R+D Global Centre of Excellence and Lero's driverless vehicles research programme. Many world-leading multinationals like Valeo, JLR, Aptiv, Renovo, and Analog Devices have their automotive activities in Ireland.

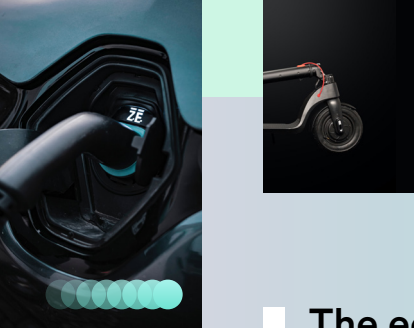

### Innovation

Over 100 Irish automotive companies are pioneering the new technologies, and innovative components and materials, that underpin connected and autonomous vehicles, new subscription and service models, and agile supply chain manufacturing.

### Tech Talent

Home to the European headquarters of the world's leading tech companies – and some of Europe's most innovative smaller companies. Ireland has unequalled tech talent and expertise in niche areas like AI/ML, IoT, Data Analytics and AR/VR.

## ■ The ecosystem and the talent to deliver the future of mobility

A vibrant, government-supported ecosystem supports the development and testing of connected and autonomous vehicles.

### ■ Automotive

Abtech Precision Ireland  
Alpha Precision  
Arralis  
ATA Tools Group  
Atto Abrasives  
Avonbrook
